Per cent black and mulatto in total population, by municipalities: 1920..... 26

INTRODUCTION.

Statistics as to the number of inhabitants of Porto Rico, by municipalities, barrios, and cities and towns, without classification as to sex, age, etc., have been published separately in a bulletin entitled "Number of Inhabitants, by Municipalities and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all topics of the population census of Porto Rico except occupations, for which statistics will be published in a separate bulletin.

This bulletin consists of 24 tables, of which 19 (Nos. 1 to 19, inclusive) give detailed figures for Porto Rico as a whole and 5 (Nos. 20 to 24, inclusive) give separate figures, in somewhat less detail, for municipalities, cities, and towns. These tables present statistics as to color or race, nativity, parentage, country of allegiance, sex, age, marital condition, school attendance, illiteracy, inability to speak English, dwellings and families, tenure of homes, state or territory of birth, country of birth, citizenship, and year of immigration.

Color or race, nativity, and parentage.—Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. All persons born in continental United States or in any of its outlying possessions are treated as natives, and all other persons as foreign born. Classification according to nativity and parentage has not, in

general, been deemed necessary for the nonwhite races, since nearly all blacks and mulattoes are natives of native parentage, while most Chinese, Japanese, and others—whose numbers are so small as to be insignificant in any event—are foreign born. In Table 2, however, separate figures as to nativity, and in Table 3 separate figures as to nativity and parentage, are given for each of the several races.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States or in any of its outlying possessions; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

Urban and rural.—Pursuant to the plan of presentation of the statistics for the states, figures are given separately for the urban and rural population in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities, towns, and villages having 2,500 inhabitants or more, the remainder being classified as rural.

Country of birth of the foreign born.—The presentation of statistics on country of birth of the foreign-born white population for 1920 is made on the basis of the postwar map. Because of the many political

POPULATION—PORTO RICO.

changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Year of immigration.—In the distribution of the foreign-born population by year of immigration, as given in Table 6, the calendar year is the basis of the classification, and the date given is the year of immigration to the United States or to any of its possessions, not necessarily the year of arrival in Porto Rico.

School attendance.—The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Illiteracy.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Marital condition.—The census classification with respect to marital condition covers five groups, namely, single, married, consensually married (that is, living together as husband and wife by mutual consent), widowed, and divorced. As these terms refer only to the marital status of the population on

the census date, a person who had been widowed or divorced but had remarried would be reported as married. The explanation of the larger proportion single among males than among females and of the much larger proportion widowed among females than among males is found in the fact that women as a rule marry at younger ages than men. Thus, as shown by Table 13, the proportion single is much greater for males than for females in the younger age groups, while for those in middle life and old age the proportion single is, as a rule, smaller for men than for women. On the other hand, the proportion widowed in nearly every age group is much greater for women than for men. This is due to the fact that, since as a rule husbands are older than their wives, the marriage relation is more frequently broken by the death of the husband than by the death of the wife. Moreover, women as a rule live to somewhat greater age than men. The difference between the number of married men and of married women may be due in part to the incorrect return of a few single, widowed, or divorced women as married, but an explanation is also to be found in the practical certainty that in some cases a married woman was living in Porto Rico at the time of the census, while her husband was living elsewhere.

² Less than one-tenth of 1 per cent.

³ Comprises 1 Filipino and 1 Hindu.

COMPOSITION AND CHARACTERISTICS.

3

Country of allegiance.—Under the act of March 2, 1917, all persons born in Porto Rico are treated as citizens of the United States unless they (or their parents in case of minors) have declared their intention to retain Porto Rican citizenship, Spanish citizenship, or citizenship of other countries.

Dwellings and families and tenure of homes.—In census usage a "dwelling" is any building or structure in which one or more persons reside. It may house a single family, as in the case of a private house, or a number of families, as in the case of an apartment house. The term "family" as here used means a group of persons, whether related by blood or not,

who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, the occupants or inmates of a hotel or institution, however numerous, are also treated as forming a single family. Thus the census family in some cases differs greatly from the natural family. The structure or part of a structure occupied by each census family is, for census purposes, a "home," and the number of families shown in Tables 19 and 24 is therefore equal to the total number of homes for which statistics as to tenure are given in those tables.
